# SMALL WREATHS

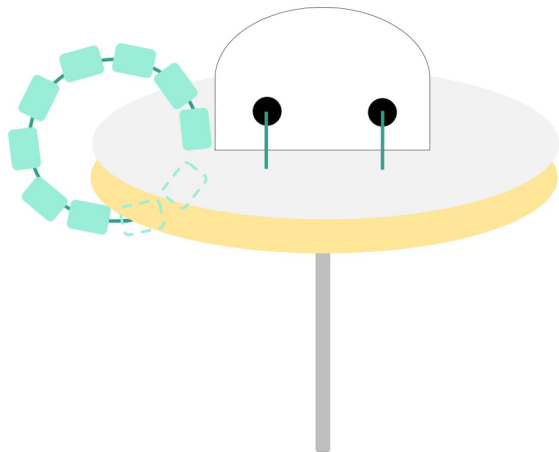

Cut small round piece of textile layer (nonwoven, very thin textile for beading embroidery) approx .diameter 1 – 1,5 cm. Cut 1 metr of thread and make knor 1 cm far from its end. Go throught of textile in middle. Add on thread one 2-hole Cabochon, go throught bothh holes (fig. 1). Thread goes up.

Cut same size and shape of artificial leather. Put ear stud in middle so, that more peasant side of leather goes to the side of ear later. Glue together. Put glue on open part of ear stud as well. Glue textile on this side. End of thread with knot is hiddnen into drop of glue between textile and leather. Make sure central position of ear stud and 2-Hole cabochon (fig. 2). Let it dry.

Thread went recently up, so go down throught both layers as close as possible to 2-hole Cabochon, still without beads. Make sure threads is down. Now put 10 beads of Miyuki Delica on thread, go throught textile and leather down as close as possible to 2-hole Cabochon. This way make loop (fig. 3). Put again 10 beads and make anothe loop very close to previous loop.

This way go around all 2-hole Cabochon. Make loop very close to each other to reach nice design. If you can see somewhere textile between loops, go back and make additional loop.
