Thread your needle with a comfortable length of thread and pick up DiscDuo and Miyuki 4 times. Make a knot. Pass your needle through the second hole of the nearest DiscDuo (pic 1).

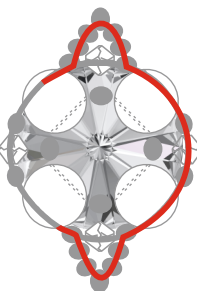

Pick up Miyuki, Swarovski Bicone 3mm and Miyuki and pass your needle through the second hole of the next DiscDuo. Continue the same way through all four Disc Duo beads. Pass your needle through the first Miyuki and Bicone of this step (pic 2).

Pick up Miyuki, DiscDuo and Miyuki and pass your needle through the next Bicone. Repeat a further 3 times. Pass your needle through the upper hole of the first DiscDuo of this step (pic 3).

Place Swarovski Rivoli into the beaded nest. Pull the thread firmly to snug up the beads. Pick up Miyuki and pass your needle through the next DiscDuo. Repeat a further 3 times (pic 4).

Pull the thread firmly and pass your needle through all the beads. Make little loops above two opposite Bicone beads using 5 Miyuki beads (pic 5).
Make a loop on each side of Swarovski Bicone 6mm using stainless steel wire. Do the same with the 2nd Bicone 6mm. Connect Swarovski Bicone 6mm and Rivoli part together. Connect the other side of Rivoli part with the tassel using a jump ring. To embellish the tassel thread some Miyuki beads and wrap them around the tassel.
